SUMMARY OF EXPERIENCE

A New York native, Steven earned his associate degrees in Computer Science and Computer Network Topology from Niagara County Community College. Steven has been working as a software engineer, specifically within the automotive industry, since 2012. He has led teams to develop products and integrations, been involved with planning and implementation of architectural changes, worked across departments to resolve software issues, and helped update and create new software using the latest technology and techniques.

Steven currently resides in Sandy, Utah. He joined Rosenfield in 2021 as part of the Emerging Technology Services Team, where he will be leading the new internal software engineering initiative. Steven enjoys bringing a vision to life and looks forward to help transform the automotive industry with advanced data analytics.
